Aim

Enthusiastic computer science student looking for an internship where I can apply my programming skills and learn more about software development. I have experience in languages like Java, enjoy solving problems through coding and like making web pages. I am eager to work on real projects, collaborate with a team, and gain valuable hands-on experience in the tech field. My goal is to contribute to meaningful work while growing my knowledge and skills in a supportive environment.

Skill Description

HTML –

- Proficient in creating structured and interactive webpages using HTML.
- Familiar with integrating multimedia elements and forms. Understanding of responsive web design principles to ensure compatibility across devices.

CSS –

- Advanced knowledge of CSS3, including flexbox and grid CSS animations and transitions for enhanced user experience.
- Familiarity with responsive design principles and able to develop website for all screen sizes.

JavaScript –

- Proficient in JavaScript for implementing interactive features and functionalities on web pages.
- Ability to manipulate and traverse the DOM (Document Object Model) using JavaScript.

Tailwind CSS –

- Experienced in using Tailwind CSS for web design and Builds responsive and mobile-friendly layouts.
- Uses utility classes for quick and easy styling and able to customizes themes to match project designs.

Data Structures And Algorithm with Java Programming -

- Knowledge of various data structures such as arrays, linked lists, stacks. Strong problem-solving skills using DSA concepts to develop efficient solutions for programming challenges and real-world applications.

S.Q.L. -

- Able to create, manage, and organize databases using SQL, making sure data is stored securely and efficiently .

GitHub-

- Proficient in using GitHub for version control, collaborative development, and code management. Skilled in creating and managing repositories, branching and merging to ensure efficient team collaboration.

GIT-

- Proficient in using Git for source code management, enabling efficient tracking of code changes, managing multiple versions, and collaboration across development teams.

PROJECTS

Project-1

- ➢ **Project-Name** - Frontend-Music-player.
- ➢ **Technologies and tools** - HTML, CSS, JavaScript.
- ➢ **Description** - Anime-Fy is an interactive front-end music Web App designed to provide users with an engaging and seamless experience for discovering, listening to music. The app aims to combine intuitive design with powerful features to cater to both casual listeners and avid music enthusiasts.

Project-2

- ➢ **Project-Name**- Weather App.
- ➢ **Technologies and tools** – HTML, CSS, JavaScript.
- ➢ **Description-** This weather Web App is designed to provide users with real-time weather information, forecasts, and related data based on their geographic location or a location of their choice.

Project-3

- ➢ **Project-Name**- Quiz Game Web App.
- ➢ **Technologies and tools –** HTML, CSS, JavaScript.
- ➢ **Description -** Developed an interactive and user-friendly quiz game web application where users can test their General knowledge. The app features real-time feedback, scoring making it engaging for users of all ages.

EDUCATION

Galgotias College of Engineering and Technology   **Expected – August 2025**

Bachelor of Technology in Computer Science (GPA: 66.4./10.00)   Greater Noida, Uttar Pradesh

MODERN SCHOOL   **Completed – March 2019**

CLASS 10TH (CBSE Board)   (82.8/100)   Noida, Uttar Pradesh

MODERN SCHOOL   **Completed – March 2021**

CLASS 12TH (CBSE Board)   (70.2/100)   Noida, Uttar Pradesh

Social Engagements

- **Sports** - Played in Adidas uprising football tournament , Took part in 10 km Marathon
- **Member**- Member of coding club in college.
